TO WHOM IT MAY CONCERN

By this letter, I, Captain T.A. Fensome, can confirm that ALSIM SIMULATORS has provided our FTO with first class service after the purchase of our training device, including installation and maintenance assistance.

We have operated our AL200MCC FNPT 2 in the three years since 2008 and it has served our goal in flight training. Our flight training model has been based on the airline training system in which we have used the simulator extensively during the programs, sometimes operating up to 20 hours per day.

Following our development and expansion, we have chosen to purchase the ALX in order to increase our programs to include the MCC and jet transition training. The ALSIM simulator has proved to be extremely reliable, with virtually no down time to our programs. The ALSIM maintenance VPN online system works very well and the spares kit has more than enough parts to cope with local problems. I have found the ALSIM team in Nantes to be very professional and courteous, and quick to respond to any questions.

I have no doubt that, after an exhaustive study of simulators, the ALSIM simulator was the best one for our training programs and I would have no problem in recommending it to other training institutions. Please feel free to call me if you have any questions.
